

CABLE & WIRE STRIPPER  
 MODEL NO.:ST300

Applicable Cable (3 in one machine)	High voltage wire BTW Ø 5m/m ~ Ø100mm
	Small sized wire BTW Ø 2m/m ~ Ø13mm
	Cutting the exterior covering being surrounded by a communicating cable wire, 2nd, 3rd, or, 4th covering of interior wiring.
Total Power	3HP/2.25kw
Voltage	220 v/ 340v
Dimension & weight	W580mm x L900mm x H1200mm/450KG

Applying three different types of mechanism, the machine can strip exterior covering and interior covering of wire in accordance with the shape and size of scrap wire or defective wire.

For more detail, the machine is equipped with two parts being put together to make the stripping process to be effective: thickness selective stripping part and thickness adjustable stripping part. The thickness selective stripping part can cut and strip the interior covering of wire by selecting the thickness of interior wiring inserted into wire with the upper pressure roller of exterior covering cutting part repeatedly opening and closing. The thickness

adjustable stripping part can strip the interior wiring by adjusting the cut depth according to the thickness of interior wiring.
